§8–101.

- (a) In this title the following words have the meanings indicated.
- (b) “Board” means the Radiation Control Advisory Board.
- (c) “Emergency” means a sudden and unforeseen condition of such public gravity and urgency that it requires immediate response to protect the public health and welfare.
- (d) “General license” means a license that, under the rules and regulations adopted by the Department under this title, is effective without the filing of an application by the licensee.
- (e) “Person” includes any public or municipal corporation and any agency, bureau, department, or instrumentality of State or local government and, to the extent authorized by federal law, federal government.
- (f) “Radiation” means:
 - (1) Ionizing radiation, including gamma rays, X-rays, alpha particles, beta particles, neutrons, high speed electrons, high speed protons, and any other atomic or nuclear particles or rays;
 - (2) Any electromagnetic radiation that can be generated during the operation of a manufactured device that has an electronic circuit; or
 - (3) Any sonic, ultrasonic, or infrasonic waves that are emitted as a result of the operation, in a manufactured device, of an electronic circuit that can generate a physical field of radiation.
- (g) “Specific license” means a license that, under the rules and regulations adopted by the Department under this title, is effective only after the applicant files an application and the Department approves the application.
